

Saving Private Ryan

No, its nothing to do with a soldier, but a 71 MGBGT, an endangered species. Someone didn't stop in time, were they texting? on their mobile? or adjusting their radio controls ?. Who knows, but BANG, and a lot of damage. When first sold in 66, the GT's were spoken of as to a poor mans Aston Martin, and sold in reasonable numbers, but later fell out of favour, with the roadster being the more desirable, and worth more than the fixed head coupe. Because of this, many were run into the ground, and scrapped, due to their lower value against the roadster as restoration costs are fairly similar for both models. How times have changed, and values have firmed up recently - really good ones selling for over £6 grand, and half decent ones, £3000. This Teal blue model shows around 75000 ml. and has had 4 owners in it's 44years. It does drive very well, and the inside shows it has been well cared for in it's life. It has to be worth saving - pictures of it's reconstruction will be posted as work progress's.

Many thanks.

Regards Derek.
